Personal Profile

David has been involved with the construction industry for over four decades - much of this time in senior appointments with contractors and consultants - and has a proven track record of resolving major construction problems and disputes. His experience and specialist knowledge both in the UK and overseas covers a diverse cross-section of projects including tunnelling, roads, marine construction, mining, renewable energy, offshore wind farms, commercial developments, high rise structures and stadiums.

A problem-solver and adept negotiator, David has been instrumental in the resolution of countless time and monetary disputes between contracting parties. He has also represented many clients in successful adjudication proceedings and provided expert support in arbitration and legal actions. A consummate professional, David advises on many difficult procurement, contractual and management issues at all stages of the project life cycle and has contributed to the successful outcome of many large and complex projects.

Expertise

- Project Management /Development
- Construction Management
- Commercial Management
- Arbitration & Litigation Support
- Adjudication Claims Preparation & Defence
- Expert Witness
- Insolvency Work
- Procurement

David's career has progressed naturally into his current senior commercial role as joint founder and now Director of QUALSURV, where he remains today. Of his 40 years of experience in the Civil Engineering and building aspects of construction, he has spent over 10 years specialising in the Renewable Energy Sector. His most recent project, from April 14 is for Nobelwind based at Parkwind in Leuven. He provides contract and commercial support to the Parkwind development team along with an involvement in the preparation and execution of pre-qualification procedures, contract writing based on the FIDIC Forms of Contract and preparation of Invitations to Tender.
