Proposed Rail Crossing, Hill Top Development

PROJECT

Proposals for an at-grade rail crossing to provide new access to industrial & commercial development land currently served by an underbridge with restricted headroom. The new crossing and future station will be approached by a new highway constructed on embankments adjacent to Midland Metro Line 1.

QUALSURV INVOLVEMENT

QUALSURV assisted the Client with an HMRI Application and a Legal Agreement with the infrastructure owner and Duty Holder. In addition, it provided pretender construction, contractual and procurement advice to client Metropolitan Estates Ltd including a detailed tender programme for the infrastructure including the installation of the proposed level crossing on the live railway.
